

The Lower Shore Child Care Resource Center presents
A Workshop for Child Care Providers/Early Educators/Mental Health Practitioners

The Devereux Early Childhood Initiative's

Four steps for building supportive relationships that encourage emotional awareness and emotional control in children ages 3 through 8

FLIP IT WAS CREATED:

- For teachers and parents who need an effective, simple strategy to help with challenging behaviors
- To provide caregivers with a new and easy way to apply what they already know from their own experience as well as the best practice research
- To encourage supportive relationships between children and adults by starting with a base of empathy
- With an emphasis on building emotional awareness and emotional control in young children that will last a lifetime
- To be a universal as well as targeted intervention that can be applied to support the emotional growth of all children
- As a problem-solving strategy that leads to healthier coping strategies and resilience
